DURHAM, NH – Bernie Sanders continues to lead the Democratic field in New Hampshire and a plurality of likely Democratic voters say he is the most progressive candidate and has the best chance to win the general election. Support for South Bend (IN) Mayor Pete Buttigieg has increased markedly since February and nearly equals support for Joe Biden. Half of likely Democratic voters express concern over how nominating a candidate over 70 will affect the general election; fewer are worried about nominating an openly gay or female candidate. Likely Republican primary voters express little support for potential challengers to Donald Trump.

These findings are based on the latest **Granite State Poll\***, conducted by the University of New Hampshire Survey Center. Five hundred forty-nine (549) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between April 10 and April 18, 2019. The margin of sampling error for the survey is +/- 4.2 percent. Included in the sample were 208 likely 2020 Republican Primary voters (margin of sampling error +/- 6.8 percent) and 241 likely 2020 Democratic Primary voters (margin of sampling error +/- 6.3 percent).

### Interest in 2020 New Hampshire Presidential Primary

Despite the 2020 New Hampshire Presidential Primary moving closer and many candidates declaring the start of their presidential campaigns, interest among Granite Staters in the 2020 New Hampshire Presidential Primary is unchanged since February. Just under half of Granite Staters (48%) say they are extremely interested in the Primary, 32% are very interested, 11% are somewhat interested, and 9% are not very interested. Interest in the 2020 Primary is considerably higher than in April of 2007 and May of 2015 but is at a similar level to April 2011.

Democrats (55%) are more likely than Independents (43%) or Republicans (44%) to say they are extremely interested. Democrats this year report a good deal greater interest in the primary than in 2015.

\* We ask that this copyrighted information be referred to as *the Granite State Poll*, conducted by the University of New Hampshire Survey Center.

Three-quarters of New Hampshire residents (75%) say they will definitely vote in the primary, while 13% say they will vote unless there is an emergency. Five percent say they may vote, 4% probably will not vote, and 2% are unsure.

Democrats (80%) and Republicans (80%) are equally likely to say they will definitely vote in the primary while Independents (63%) are less likely to say they will definitely vote.

### 2020 Democratic Primary

Despite the high level of interest, few likely voters have decided whom they will vote for in the 2020 Democratic Primary. Seventy-seven percent of likely Democratic primary voters say they are still trying to decide whom they will support in 2020, while 14% say they are leaning towards someone and only 9% have definitely decided. The percentage of likely Democratic primary voters who say they have definitely decided or are leaning towards someone (23%) has slightly increased since February (15%).

A plurality of likely Democratic primary voters (40%) could not name a candidate when asked an open-ended question about whom they will vote for in the 2020 Primary. Vermont Senator and 2016 winner Bernie Sanders is mentioned by likely Democratic primary voters most frequently (18%), followed by Former Vice President Joe Biden (12%), and South Bend (IN) Mayor Pete Buttigieg (11%). Four percent mention California Senator Kamala Harris, and 3% each mention Former Texas Congressman Beto O'Rourke, New Jersey Senator Cory Booker, or Massachusetts Senator Elizabeth Warren.

### Preferred Democratic 2020 Presidential Nomination Candidate - Open-ended

The percentage of Democratic primary voters who are undecided or cannot provide a name (40%) has decreased considerably since August 2018 (65%) as many candidates have begun campaigning in New Hampshire. The number of likely Democratic primary voters who mention Sanders (18%) has declined since February (28%) while the percentage who mention Buttigieg (11%) has increased markedly since February (1%).

### Preferred Democratic 2020 Presidential Nomination Candidate - Open-ended - Over Time

When provided a list of major Democrats who have declared themselves as candidates for the 2020 nomination or who are considered likely to do so, 30% of likely Democratic primary voters support Sanders, 18% pick Biden, and 15% select Buttigieg. Fewer Democratic voters choose Warren (5%), Harris (4%), Booker (3%), O'Rourke (3%), Minnesota Senator Amy Klobuchar (2%), entrepreneur Andrew Yang (2%), or Ohio Congressman Tim Ryan (2%).

One percent or less support Miramar (FL) Mayor Wayne Messam (1%), New York Senator Kirsten Gillibrand (1%), Hawaii Congresswoman Tulsi Gabbard (1%), California Congressman Eric Swalwell (1%), Former Maryland Congressman John Delaney (<1%), Former Housing and Urban Development Secretary Julian Castro (<1%), or Washington Governor Jay Inslee (<1%). Less than 1% of respondents mention another candidate while 12% remain undecided. No respondents indicated their support for former Colorado Governor John Hickenlooper or author Marianne Williamson.

Likely Democratic primary voters aged 18 to 34, self-identified Independents, and men are more likely than others to support Sanders, while those aged 65 and older are more likely to support Biden.

**Preferred Democratic 2020 Presidential Nomination Candidate - List - April 2019**

While Biden continues to garner the second most support among likely Democratic Primary voters (18%), his share of support has fallen considerably since early 2018, while support for Sanders (30%) has remained largely steady as he has led the field over the past year. Biden (-4%) and Harris (-6%) have seen the largest declines in support since February.

By contrast, support for Buttigieg (15%) has increased dramatically since February, when he only garnered 1% of support. Buttigieg (+13%) and Sanders (+4%) have seen the largest increases in support since February.

Warren (5%), while still among the top five of Democratic candidates, continues to experience far less support than she enjoyed in 2017 and 2018. In the last year, Warren (-7%) and Biden (-9%) have seen the largest declines in support.

**Preferred Democratic 2020 Presidential Nomination Candidate - List - Change since February 2019**

**Preferred Democratic 2020 Presidential Nomination Candidate - List - Change since April 2018**

While many believe he intends to do so, Biden has not yet announced his candidacy for President. Just over half of likely Democratic voters (51%) say that they would like Biden to run, much higher than the percentage of Democratic voters who currently support him for the nomination (18%). Thirty-six percent say that they would like Biden not to run, 8% have no opinion or don't care, and 4% don't know or are unsure.

### Preference on Biden Running for President

When asked whom they would support if their preferred candidate were not on the ballot, 19% of likely Democrat primary voters say they would support Sanders, 18% would support Biden, 13% would support Warren, 8% each would support Booker or Harris, 5% would support Buttigieg, and 3% would support O'Rourke. Very few likely Democratic primary voters say their second choice would be Klobuchar (2%), Gabbard (2%), Delaney (2%), Yang (1%), Gillibrand (1%), Inslee (1%), Swalwell (1%), Ryan (1%), Hickenlooper (<1%), Castro (<1%), or Messam (<1%). Two percent say their second choice would be someone else, 6% say they don't have a second choice, and another 6% don't know or are undecided.

Nearly half of Sanders supporters select Biden or Warren as their second choice, while nearly half of Biden supporters select Sanders or Harris as their second choice.

### Second Choice for Democratic 2020 Presidential Nomination

When asked which candidate they would not support under any circumstances, more than half of likely Democratic voters (55%) say that they don't know or are unsure (28%) or that all of the candidates are acceptable to them (27%). Fourteen percent of likely Democratic voters say they wouldn't under any circumstances vote for Warren, 8% wouldn't vote for Sanders, and 5% wouldn't vote for Biden. Fewer likely voters say they wouldn't under any circumstances vote for Gillibrand (3%), O'Rourke (3%), Klobuchar (2%), Gabbard (2%), Buttigieg (2%), Booker (1%), Hickenlooper (1%), Harris (1%), Castro (1%), Delaney (1%), Swalwell (<1%), or Yang (<1%). Two percent mention someone else they would not vote for under any circumstances. Results largely resemble those in February.

### Would Not Vote For Candidate Under Any Circumstances

Likely Democratic Primary voters were asked which candidate they find to be the most likeable. Just over a quarter (28%) believe Biden is the most likeable Democratic candidate, 22% say Sanders is most likeable, 13% say Buttigieg is most likeable, and 11% say that O'Rourke is most likeable. Fewer likely primary voters say that Harris (2%), Warren (1%), Yang (1%), Booker (1%), Ryan (1%), Klobuchar (1%), Gillibrand (<1%), Delaney (<1%), Gabbard (<1%), Castro (<1%), or Williamson (<1%) is the most likeable Democratic candidate. Seventeen percent don't know or are undecided whom they consider to be the most likeable Democratic candidate.

Compared to February, a far larger proportion of likely Democratic voters (<1% in February, 13% in April) believe Buttigieg is most likeable, while slightly fewer consider Kamala Harris (9% in February, 2% in April) to be most likeable.

Just over one-third of likely Democratic primary voters (36%) believe Sanders is the most progressive Democratic candidate; 10% believe Warren is the most progressive, 4% say Buttigieg is the most progressive, and 3% each say that O'Rourke, Yang, or Biden is the most progressive candidate. Fewer candidates consider Harris (2%), Booker (1%), Klobuchar (1%), Williamson (<1%), Gabbard (<1%), Delaney (<1%), or another candidate (2%) to be most progressive, while 38% don't know or are undecided. Compared to February, slightly fewer likely Democratic voters consider Sanders (44% in February, 36% in April) to be most progressive, while a slightly larger proportion (28% in February, 38% in April) are undecided.

In an important shift since February, three in ten likely Democratic primary voters (30%) believe Sanders is the candidate with the best chance to win the general election, while a quarter (25%) believe Biden has the best chance. In February, a plurality of likely Democratic primary voters said Biden had the best chance to win the general election, but Sanders (30%) now holds a small lead over Biden (25%) on the question. Far fewer likely primary voters say that Buttigieg (4%), O'Rourke (3%), Warren (2%), Harris (2%), Booker (2%), Klobuchar (<1%), Delaney (<1%), Gillibrand (<1%), Yang (<1%), or another candidate (1%) has the best chance to win the general election. Thirty percent don't know or are undecided whom they consider to have the best chance to win the general election.

Respondents aged 18 to 34, Connecticut Valley residents, and men are more likely than others to say that Sanders has the best chance to win the general election while Manchester Area residents, those aged 65 and older, and those who have completed postgraduate work are more likely to say that Biden has the best chance to win.

The Democratic primary field is historically large and diverse, including many candidates who are ethnic or racial minorities, women, or over the age of 70, as well as one openly gay candidate.

Nearly half of likely Democratic voters (49%) say they are very (14%) or somewhat (36%) concerned that nominating a candidate over the age of 70 will decrease the party's chance of winning the presidential election. Three in eight likely Democratic voters (38%) are very (12%) or somewhat (26%) concerned about nominating an openly gay candidate, 23% are concerned about nominating a female candidate, and only 13% are concerned that nominating a white male candidate will decrease the party's chance of winning the general election.

Seacoast residents are more likely than others to say they are very or somewhat concerned about nominating a candidate over the age of 70, self-identified Independents and Massachusetts Border residents are more likely to be concerned about nominating an openly gay candidate, respondents with a high school education or less are more likely to be concerned about nominating a female candidate,...

Concern Nominating Following Demographic Types of Candidates Will Decrease Chances of Winning Presidential Election

## 2020 Republican Primary

Half of likely Republican primary voters (50%) are still trying to decide whom they will support in the 2020 Republican Presidential Primary. Eight percent say they are leaning towards someone while 43% say they have definitely decided. The proportion of likely Republican voters who say they have definitely decided (43%) has increased substantially since August 2018 (23%).

**Definitely Decided on Candidate - Republican Primary Voters**

While more than 80% of self-identified Republicans approve of President Trump's job performance, only 63% of likely Republican primary voters say they plan on voting for Donald Trump in the 2020 New Hampshire Republican presidential primary, slightly higher than February (56%). Fourteen percent say they plan on voting for another candidate, while 23% don't know or are unsure.

Likely Republican primary voters who listen to conservative radio, those aged 35 to 49, those who voted for Donald Trump in 2016, North Country residents, self-described conservatives, and those with a high school education or less are more likely than others to say they plan to vote for Trump in the 2020 Republican primary. Likely Republican primary voters with a college degree or more education, self-described moderates, and those aged 18 to 34 are less likely to say they plan to vote for Trump.

**Plan on Voting for Trump or Other Republican Candidate?**

Former Massachusetts Governor William Weld recently announced his intention to challenge Donald Trump for the 2020 Republican Presidential nomination, while others have tested the waters.

When asked to choose between Trump, Weld, and possible candidates former Ohio Governor John Kasich and Maryland Governor Larry Hogan, three-quarters (76%) of likely Republican primary voters say they would vote for Trump if the primary election were held today, 10% would support Kasich, 5% would support Weld, 1% would support Hogan, and 8% don't know or are undecided. Support for Trump (76%) has slightly increased since February (68%), while support for Kasich (17%) has slightly declined.

Conservative radio listeners, those aged 35 to 49, those who voted for Trump in 2016, Connecticut Valley residents, and self-described conservatives are more likely than others to say they would vote for Trump if the Republican Primary were held today. Those aged 18 to 34, those with a college degree or more education, and self-described moderates are more likely than others to say they would vote for Kasich, Weld, or Hogan.

### Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. Five hundred forty-nine (549) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between April 10 and April 18, 2019. The margin of sampling error for the survey is +/- 4.2 percent. Included in the sample were 208 likely 2020 Republican Primary voters (margin of sampling error +/- 6.8 percent) and 241 likely 2020 Democratic Primary voters (margin of sampling error +/- 6.3 percent). The design effect for the survey is 1.2%.

The random sample used in the Granite State Poll was purchased from Scientific Telephone Samples (STS), Rancho Santo Margarita, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers. When a landline number is reached, the interviewer randomly selects a member of the household by asking to speak with the adult currently living in the household who has had the most recent birthday. This selection process ensures that every adult (18 years of age or older) in the household has an equal chance of being included in the survey.

The data have been weighted to adjust for numbers of adults and telephone lines within households. Additionally, data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).
